

PREVIOUS BALANCE

The previous balance includes all amounts from previous billing statements that have not been paid by the end of the current billing period.

SERVICE ADDRESS

This address should match the location being billed for water service. Some customers pay bills for more than one location. The service address enables the customer to track the amount paid for each location.

METER READING

These numbers represent the actual, current and previous readings from your water meter. To determine your consumption for the billing period, subtract the previous reading from the current reading and then multiply by 1,000. This will give you the total usage amount.

SERVICE CHARGE

The service charge is a flat charge that is payable whether water is used or not. The service charge covers the costs of meter reading, customer service and processing bills.

PRORATED CONSUMPTION

Denver Water will prorate the consumption block on your first monthly bill if your billing period is more than 35 days. This will ensure you're not paying for water use at a higher rate. On a typical bill, this chart shows how much water you used in each consumption block and the corresponding price per 1,000 gallons.

SEWER CHARGES

In the City and County of Denver, sanitary sewage service is provided by the Wastewater Management Division. Sewage charges are included on Denver Water bills to reduce administrative charges to customers. Denver Water collects the money and forwards it to the Department of Public Works.

Your bill may list a sewer provider other than Wastewater Management Division depending on where you live. Denver Water only bills for Wastewater Management Division.

PAYMENT STUB

Please detach and return with payment. Denver Water offers several bill pay options to help make paying your bill quick and easy. See reverse side of your bill for more details.
