

DENVER BOARD OF WATER COMMISSIONERS

Meeting Date: October 9, 2013

Board Item: V-E-3

Agreement with ASI Constructors, Inc. for the Gross Dam Test Quarry Development and Rock Processing Contract 15142A

Action by Consent Action Information

On September 19, 2013, a proposal was negotiated for the Gross Dam Test Quarry Development and Rock Processing Project. This project's scope of work is to complete the development of a test quarry, haul and process obtained materials, and develop preliminary concrete mix design information in support of the planned Gross Dam Enlargement Project.

The Agreement was negotiated with ASI Constructors, Inc. to provide services in the amount of \$124,500.00. A sole source solicitation is necessary for this work because ASI Constructors is the only locally (Pueblo, Colorado) qualified company judged to have the specific and required experience. ASI Constructors has built 3 dams within 25 miles of Gross Reservoir in or from materials similar to that proposed for the Gross Dam Enlargement. ASI Constructors is recognized as one of the premier concrete dam builders in the nation; they also have built the most RCC dams in Colorado. Denver Water is fortunate to have this experience locally for consultation during the initial phases of the project.

The 2013-2014 Capital Improvement Plan (MPC 1AL0014) includes sufficient funds for this project.

No Minority and Women Business Enterprise (MWBE) goal was established for this work due to its specialized nature; however ASI Constructors is seeking opportunities to utilize MWBE's where possible.

Recommendation:

It is recommended that the Board approve Agreement 15142A to ASI Constructors, Inc. for the Gross Dam Test Quarry Development and Rock Processing Project in the amount of \$124,500.00.

Budget Considerations

Master Plan Code(s): 1AL0014
