

DENVER BOARD OF WATER COMMISSIONERS

Meeting Date: August 8, 2012

Board Item: V-E-1

Interconnect Agreement with Roxborough Water & Sanitation District

Action by Consent

Action

Information

Roxborough Water & Sanitation District is building a new water treatment facility to serve their customers. During the construction period, the District desires an emergency interconnection to support their system in case of an outage or system disruption. Denver Water can provide such an interconnection with little to no disruption of its own system.

This agreement covers two emergency connections on Conduit 27 and Conduit 133 near the Foothills Water Treatment Plant. Both connections are one-way to the District. This agreement is temporary to aid the District during unplanned outages. It allows for one year extensions by mutual, written agreement of both parties.

It is not anticipated that the proposed agreement will have any immediate effect on Denver Water's budget because it is primarily operational in nature.

Recommendation:

It is recommended that the Board approve this agreement.

Approvals:

Respectfully submitted,

Patti Wells
General Counsel

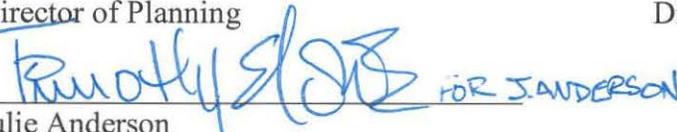

James S. Dochhead
CEO/Manager

Dave Little
Director of Planning

Tom Roode
Director of Operations and Maintenance

Julie Anderson
Director of Customer Relations
