

Denver Board of Water Commissioners

Title:

Third Amendment to Agreement with Civil Resources, LLC

Meeting Date: 2/11/2009

Contract/Proposal

Action by Consent

Action

Information

Civil Resources, LLC is being asked to continue groundwater sampling and monitoring of existing wells at the Lupton Lakes Gravel pit and mining operations. Although the Division of Reclamation, Mining and Safety (DRMS) is no longer requiring the monitoring program, Denver Water has decided to continue to monitor the groundwater during the mining operations. Background data has been established for the site and discontinuing the monitoring would require Denver Water to re-establish the background data if site conditions or mining operation change. The monitoring has been reduced from four sampling events down to two events to monitor and maintain this background data for the site.

RECOMMENDATION:

Extend the contract completion date to December 31, 2009 with a contract increase of \$20,000 for a total compensation of \$105,400.

Approvals:

Robert Mahoney
