

Denver Board of Water Commissioners

Title:

AGREEMENT 11966D WITH DENVER PUBLIC SCHOOLS

Meeting Date: 5/13/2009

Contract/Proposal 11966D

Action by Consent

Action

Information

Denver Public Schools wishes to take advantage of Denver Water's program to assist public facilities in becoming more water efficient and Agreement 11966D has been negotiated. Denver Water will purchase water saving fixtures for fourteen schools and the school district agrees to install the fixtures within 120 days of delivery. The fixtures are being purchased under a separate agreement.

The estimated water savings from the fixture replacement at these fourteen schools is 24 acre-feet annually, at a cost to Denver water of approximately \$7,333 per acre-foot. It is presumed that upon successful completion of this contract, Denver Public Schools will continue the work at other schools within the District.

RECOMMENDATION:

It is recommended that the Board approve Agreement 11966D with Denver Public Schools for the installation of water saving devices.

Approvals: Marie Bassett
Marie Bassett, Director Public Affairs

Patricia L. Wells
Patricia L. Wells, General Counsel
