

Denver Board of Water Commissioners
Title:
**Amendment to Agreement with BKD, LLP
Construction Contract Agreed Upon Procedures**

Meeting Date: 05/13/2009

Contract/Proposal:

Action by Consent

Action

Information

In contract No. 12052A, the Board engaged the forensic accounting services of BKD, LLP to review construction documents generated during construction of the Foothills Chlorine Contact Basin and Chemical Feed Improvements, the largest of three recent projects using the CM/GC project delivery method. The review has taken more time and resources than anticipated in the original contract due to the vast number of documents (over 17,000) and the fact that the contractor's work under the last bid package has not been completed. In addition, forensic accounting for the other two CM/GC contracts, Capitol Hill Storage Tank and Montclair Pump Station, should be conducted. This proposed contract amendment will cover the costs of completing the Foothills review and conducting the accounting for Capitol Hill and Montclair.

RECOMMENDATION

It is recommended that the Board approve this contract amendment.
