Action

Information

Denver Water requires dry barrel fire hydrants for the replenishment of Warehouse stock. The fire hydrants are used for new installations and replacements throughout the distribution system.

On November 9, 2011, the Board approved Contract 13770A for Dry Barrel Hydrants with HD Supply Waterworks LTD. The anticipated volume and award amounts were based on the historical usage trend for the initial year of the contract. In this first year of the contract, demand for dry barrel fire hydrants has exceeded the initial projection due to increase in activity for capital and operating projects. As reflected in the budget forecast for the remainder of 2012 and 2013, the contract amount should be adjusted to reflect these forecasts and to cover the remainder of the contract period. Funds for Dry Barrel Fire Hydrants are included in the 2012 Budget and Ten Year Capital and Operating Plans.

Recommendation:

It is recommended that the Board authorize the additional funds for Contract No. 13770A with HD Supply Waterworks LTD for dry barrel fire hydrants for the existing contract period through December 31, 2014, in the amount of \$1,500,000.00, for a total contract amount not to exceed \$1,920,000.00.

Approvals:

Respectfully submitted,

Thomas J. Roode
Director of Operations & Maintenance

James S. Lochhead
CEO/Manager

Angela C. Bricmont
