

Gray Street Drill Update

Dear Resident,

As you have noticed, the drilling for the new drain line for the Ashland Reservoir Tank Replacement Project has been coming along smoothly. In order to pick up the pace and finish the street work as soon as possible, the City of Wheat Ridge and Denver Water has granted permission for Western Summit Constructors, Inc. (WSCI), to perform the Gray Street construction work on Saturday 8/03, 8/10, 8/17, and 8/24. This will allow WSCI to complete the new drain line quicker than expected and open the street back up to the surrounding community. The weekend work is limited to Saturday's from 7:00 am to 5:00 pm.

If you have any questions pertaining to the Ashland Reservoir Tank Replacement Project, please do not hesitate to contact the Ashland Public Relations Representative Connor Hardy.

WSCI appreciates your cooperation and understanding. We hope to return Gray Street back to the residents as quickly as possible.

Thanks,

Connor Hardy
