

DENVER BOARD OF WATER COMMISSIONERS

Meeting Date: July 11, 2012

Board Item: V-A-14

**Enterprise IT Application Integration -
TIBCO Middleware**

Action by Consent

Action

Information

TIBCO middleware from TIBCO Software, Inc. is used for enterprise IT application integration purposes at Denver Water and supports our Service Oriented Architecture (SOA). This software allows for the development of interfaces between application systems, which allows Denver Water to perform accurate and timely billing, interfaces with our financial institutions for payments and automation of other business process such as mobile workforce management.

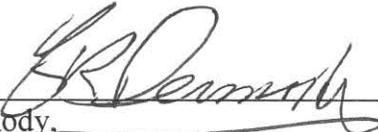

Denver Water needs to buy additional TIBCO software licensing to simplify the management, increase security and support the growth of our integrated environment, as outlined in the attached order form.

Expenses related to additional TIBCO software licenses were not full budgeted in 2012. A 2012 budget variance has been requested and approved for this purchase.

Recommendation:

It is recommended the Board approve the purchase of additional middleware licenses from TIBCO Software, Inc. for an amount not to exceed \$149,955.

Approvals:

Chris Dermody,
Director of Information Technology

Respectfully submitted,

James S. Lochhead, CEO/Manager

Patricia L. Wells,
General Counsel
