

Gray Street Drill Notification

Dear resident,

Beginning this Thursday 7/25, Western Summit Constructors, Inc. subcontractor will be performing a directional drill on the Gray Street from 28th to the Ashland Reservoir. The directional drill is for the installation of a new drain line for the Ashland Reservoir Tank Replacement project. This drill process requires certain road restrictions along Gray Street. The attached page shows the traffic control that will be implemented. There will be no through traffic on Gray Street from 26th Avenue to 29th Avenue. All local residents will be granted access to their residents. Western Summit respectfully requests that all local residents to park in their driveways or alley rather than on Gray Street, especially those in the intersection of 28th and Gray (see attached traffic control plan).

If you have any questions pertaining to the street work please contact Western Summits Project Public Relations Representative Connor Hardy. Connor is also available at the Ashland project trailer located on 30th and Harlan.

Western Summit appreciates your cooperation and understanding, and we hope to have as little impact on the community as possible.

Thanks,

Connor Hardy
